

Dear Farming Colleagues,

Last week at the Fieldays at Mystery Creek we wondered whether winter would be mild and gentle on us as the temperatures were well up in the teens and there was neither wind nor rain. We certainly have the answer now! This means that feed has to be rationed and that is best done with break-feeding. You will find Details of how it is done in our previous Newsletter 13/0,3 and also on our website www.redsnapr.co.nz

Mystery Creek

Red Snap'r was there for the 17th time and had its stand once again on Site D-57. Of special interest were the solar powered energisers as well as the large mains powered units, gate handles and bulk insulators. Based on the number of orders we received during and after the Fieldays it can be safely assumed that the farming industry is in recovery mode.

We were pleased to announce some important **price reductions** to popular items i.e.

- **Solar Snap'r LIS10** \$ 288.50 inc. GST

- **Solar Stripgrazer LIS3** \$ 238.20 inc. GST

These reduced prices are now our list prices and orders can be placed through our website.

We also offered free gate anchors if you purchased at least a box of 25 Heavy Duty Gate Handles.

+

=

This deal is also still available. When you order through the website just order the gate handles, the correct number of gate anchors will be supplied automatically.

These **Gate Anchors** are also available in bags of 10 @ \$ 11.20 inc. GST.

The recently introduced **Cut-Out-Switch** caught the eye of many farmers who were looking for a switch that was sturdy, could not be manipulated by cattle and could handle high voltage.

\$ 9.70 inc. GST

Should you have any questions or would like to have some advice please do not hesitate to contact us or consult the "Knowledge Base" on our website.

For your convenience, use the on-line shop on our website!
