

Buying a New Energiser

Buying an electric fence energiser is not any different from buying any other item. The same criteria apply in each and every case. These criteria are:

- ***Quality***

You want to make sure that you are buying your energiser from a reliable source that offers the latest development, is built with high quality parts and complies with NZ regulations for electric fencing.

- ***Reliability***

You expect a solid performance that matches the manufacturer's promises on which you can count.

- ***Service***

You expect that the sales personnel know their products and recommend the energiser that you require - not too small and not too big. Remember:

1 Output Joule = 10 km of 3-wired fence

Energisers are being used under tough conditions, above all those energisers that are used directly in the paddock. The possibility of a fault occurring cannot be discounted. It is, therefore, of utmost importance that a faulty energiser is being repaired as soon as possible. Weeklong delays are a nuisance and are expensive.

- ***Economy***

*Once you have a recommendation, make sure that the price is in line with other brands on the market. There are enormous differences for the same quality within the various brands although there is no difference in quality. The **Red Snap'r** website has a list with price comparisons*

Conclusion

*If you visit the **Red Snap'r** showroom or go to their website www.redsnapr.co.nz you will find out that*

- *they offer the latest development in energisers at the top-end of the quality range.*
- *their energisers are reliable*
- *they discuss with you your requirements and their recommendations will cover your needs. All energisers are covered by a two-year warranty. Repairs are made the same day the energiser is dropped off or arrives at their workshop/showroom. Once the warranty has elapsed, repair work is still free of charge - **Red Snap'r** does not charge for labour - only for spare parts. Assessments for repair work are free of charge.*
- *The energisers offered by **Red Snap'r** are in most cases well below the prices that are offered by farming outlets*

- **Red Snap'r** energisers are either made in the USA or in Australia and fully comply with local rules and regulations

If you are in the market for an energiser visit our showroom where you will get expert advice. There is also comprehensive information on our website www.redsnapr.co.nz.

Happy farming!

Your *Red Snap'r* Team
