Best Electric Fence Fault Finder 2019

Electric fencing setups can be very expensive if you have your farm fully electrified. You will want to make sure that the electric fence is always working at the correct power level. Being sure that your fence is adequately powered gives you piece of mind that your animals are safe. The easiest and most convenient way to do this is by using a fault finder

Amazon, one of the world's largest online companies in the USA tested the fault finders they have in their range:

What Makes a Good Electric Fence Fault Finder?

- ***Easy Screen Reading***
The screen should be large and clear and the readings easy on the eye both on sunny days and in low-light conditions
- ***Good Ergonomics***
The device should be comfortable and easy to grip
- ***Battery Life and Ease of Replacement***
Each model has a different battery, some lasting longer than others. Most have replacement batteries, but some are quite tricky to remove and replace
- ***Weather Resistant Case***
All models reviewed have water-resistant cases

The top 3 rated Electric Fence Fault Finders were:

1. ***Zareba Fence Doctor*** Distributed in New Zealand by ***Red Snap'r***
Verdict: Best Readings and Displays
2. ***Gallagher Smart Fix***
Verdict: Great Features and Battery Life
3. ***Speedrite***

We are very pleased with this result as it confirms our long time claim that our “Fence Doctor” is the best fault finder on the New Zealand market. It currently costs \$179.60 incl. GST and compares more than favourably with the products of our competitors.

*We have also added a pouch to protect the Fence Doctor which includes two short-out wires that allows you to carry out repairs on the spot. This **pouch** and the wires are sold at \$ 15.00 incl. GST.*
